ISBN-13: 978-0-88839-652-5

8½" x 5½", sc, 176 pages, \$24.95

> B/w photos & line drawings throughout

> Documented Evidence, Stranger than Fiction

Does a hulking 7-foot-tall humanlike creature, unrecognized by science, roam the green, fertile valleys and lush forests of New York and New England? Common sense tells us this is hardly possible - especially in the 21st Century.

Nevertheless, we have a conundrum: how do we explain the hundreds of credible eyewitness accounts of such a creature that date back to native Indian lore and early European settlement?

Commonly known as "Bigfoot" in the United States, and "Sasquatch" in Canada, this creature has become the greatest mystery in North America.

For over thirty years, two New York State brothers, Robert and Paul Bartholomew, have methodically researched, documented, and studied the Bigfoot question in both New York and the New England states. They have traveled extensively in these regions in a passionate quest to discover the truth behind the mystery.

In this volume, Robert and Paul present the full history of the creature in New York and New England together with their analysis and conclusions.

DOES BIGFOOT EXIST? The evidence presented here provides astounding new insights into this age-old question.

Paul Bartholomew is seen here with two of the 1985 West Rutland casts at the Castleton State College "Ancient Vermont" exhibit.

Drawing by Eric Miner from witness descriptions of the creature sighted along Abair Road in August 1976.
